

# MULLARD

## INDIRECTLY HEATED A. C. MAINS VALVES

The range of valves described in the following pages comprises types representing the highest achievements in technical design and mechanical construction.

Particular attention is called to the several new types—the screened H.F. Pentodes, S.P.4 and V.P.4 and the double-diode-triode T.D.D.4, full details of which will be found on pages 22, 23 and 26.

### PRICE LIST

Type	Description.	For particulars see pages	Price
V.P.4.	Multi-mu Screened H.F. Pentode	22	17/6
S.P.4.	Screened H.F. Pentode	23	17/6
904V.	High Magnification Detector	24	13/6
354V.	Detector and general purpose	25	13/6
T.D.D.4.	Double-diode-triode	26	15/6
S.D.4.	Diode-Tetrode	27	20/-
PEN.4V.	Pentode Output valve	28	18/6
PEN.4V.A.	Pentode Output valve	29	18/6
	Earlier types for re-valving	30
